

# RHINO PARTS MODEL W6SGR

Close to  
our customers

The **W6SGR** Rhino bit is specifically designed for **extremely abusive stabilizing applications**.

The innovative broad cone-shaped carbide tip and large body separates this bit from all others.

Tests have shown that this bit excels in stabilizing applications where there are hard objects or granite boulders hidden beneath the surface.

The large heavy-duty body and large carbide base diameter maximize body life.

**Model:** W6SGR  
**Application:** Stabilizing  
**Characteristics:** Large, long-life body bit for abusive "stabilizing" requirements  
 - Stout carbide tip  
 - Large, long-life body  
 - Long sleeve
